

in recognition of **great teaching**,
this **student message** of thanks is presented to:

San Tu

THANK YOU

"Dr. Tu is one of the kindest, most attentive professors I've had! His class structure makes it impossible to do poorly. Every day, he gives us a handout and after solving some examples on the board in chalk and clearly stating the problem and formulas, he walks around the classroom and engages us with the questions, making sure no one is left in the dark when it comes to questions. He answers questions personally and doesn't single anyone out or announce it to the class until talking to a few others, which really makes it a safe space to reach out for help. He has daily office hours and always reaches out to make sure students are completely on the same page and tracking along. He makes math interesting and fun and doesn't leave anyone out."
